

Name of activity: Create Dinosaur Island Sensory Bin

Materials

- Kinetic sand
- Clay for the Volcano
 - If unwilling to use clay (brown craft paper, tape, scissors, red paint)

Instructions

1. The first thing to do is put kinetic sand into a bin.
 - Use 3lb bags of the Beach Sand variety and added it into one of our bins.
 - Can use the plastic under-bed boxes (*it measures: 23 1/2 x 16 7/8 x 5 7/8*).
2. Make a volcano
3. Creating water
 - In order to bring the island to life, you will want to pick up a lot of really fun things from the craft store.. like faux plants, stones, glass beads, tea lights, mini dinos.. etc.
 - When setting up your island, be sure to include the “water“! This could be blue clay, or blue kinetic sand, and some of the blue and teal glass stones. The stones are nice and smooth and can easily be pressed into and layered in the kinetic sand.
4. Add the plants
5. Add the rocks
6. Add in volcano
7. Add in dinos
